Conflict Minerals Policy Statement

In response to violence and human rights violations in the mining of certain minerals from the “Conflict Region”, which is situated in the eastern portion of the Democratic Republic of the Congo (DRC) and surrounding countries, the U.S. Securities and Exchange Commission (SEC) has adopted rules to implement reporting and disclosure requirements related to “conflict minerals,” as directed by the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. The rules require manufacturers who file certain reports with the SEC to disclose whether the products they manufacture or contract to manufacture contain “conflict minerals” that are “necessary to the functionality or production” of those products.

The definition of “conflict minerals” refers to gold, as well as tin, tantalum, and tungsten, the derivatives of cassiterite, columbite-tantalite, and wolframite, regardless of where they are sourced, processed or sold.

World Cord Sets supports the humanitarian goal of ending violent conflict in the DRC and surrounding countries. World Cord Sets is committed to the responsible sourcing of “conflict minerals” throughout our supply chain and to continuing to comply with the underlying SEC rules and regulations with respect to “conflict minerals”.

World Cord Sets does not procure Conflict Minerals directly from suppliers. As such, World Cord Sets has implemented procedures to ensure that specified metals are only being sourced from mines and smelters outside the “DRC Region” or mines or smelters which have been certified as “conflict free” if sourced within the “DRC Region.”

Based on information currently provided by its suppliers World Cord Sets does not knowingly use Conflict Minerals in any of its products.

World Cord Sets will continue to regularly perform due diligence and survey its suppliers to verify compliance with this policy.
